Published on Jan 23, 2019

This device can direct control F1 modules and replace F1 panels and add more useful features to your F1 system. It can be controlled wireless from a fireTEK remote (manual, automatic, semiautomatic with or without music) from panel buttons (automatic or semiautomatic), external time code, computer software (firetek and soon UF software), firetek android application and even from a firetek panel (act as a DMX controller). With this router you can benefit of all firetek innovations like wireless mesh, fully automatic real time error detection, DMX control and more.
